Multi-Plus clamp, St/tZn, Ø 8-10 mm

Multi-Plus terminal- and connection-clamp according to DIN EN 62561-1 with intermediate plate for the universal use as T-, cross-, parallel-clamp, joint-connector and metal sheet terminal clamp.

Material of clamp:	St/tZn
Fit:	Ø 8-10 mm
Clamping range:	up to 8 mm
Contact surface:	at least 10 cm ²
Screw:	Carriage bolt M10 with nut, St/tZn

Connecting varieties of the Multi-clamp:

T-connection

Cross-connection

Parallel-connection

end to end-connection

Stem clamp

Multi-Plus als Anschlussklemme

The original Multi-clamp was invented by J. Pröpster in 1981 and since then has been established a million times worldwide.

It is the most varied lightning protection component and the centerpiece of the multifunctional system of J. Pröpster.

Benefits:

- Only one clamp for all types of wire connections
- Max. contact due to consistent clamping
- Extremely shortened installation time - only one screw M10
- Optimal handling at planning, acquisition and storage

DIN EN 62561-1
